```
# apt-get install viewvc
```

Add Line

to httpd.conf

modify/etc/viewvc/viewvc.conf

```
root_parents = /path/to/dir/which/contains/svn/roots :
```

svn

1. To enable code highlight, also install highlight and set:
use_highlight = 1
2. By default there is a line cvs_roots = cvs: /home/cvsroot. Comment it out otherwise there is a "cvs" directory in your web interface which links to nothing.
